

# Progress Report - TechMinds

## Data enter automated drawing

### Team Members:

Team Member	Designation
Serge EL ARAMOUNY	Project Manager
Vijaya Srikar PORALLA	Software Developer
Thaiveena PARTHASARTHY	Software Developer
Mohammed Zaid SYED	Data Analyst
Venkatesh JEYARAJ	Data Analyst

### Meeting Schedule:

Date	Time	Tasks	Status
03/06/2019	05.30 – 05.45	Discussed about status of individual progress	Completed
07/06/2019	13.30 - 16.30	PRI review meeting with Mr. Olivier	Completed
13/06/2019	13.00 – 13.30	Discussed about the implementation of Mr. Berthet's feedback	Completed
18/06/2019	17.00 – 17.30	Integration of code to increase the number of racks	Scheduled
24/06/2019	13.30 – 13.45	Code to change rack colour based on criticality	Scheduled

### PRI Review Meeting:

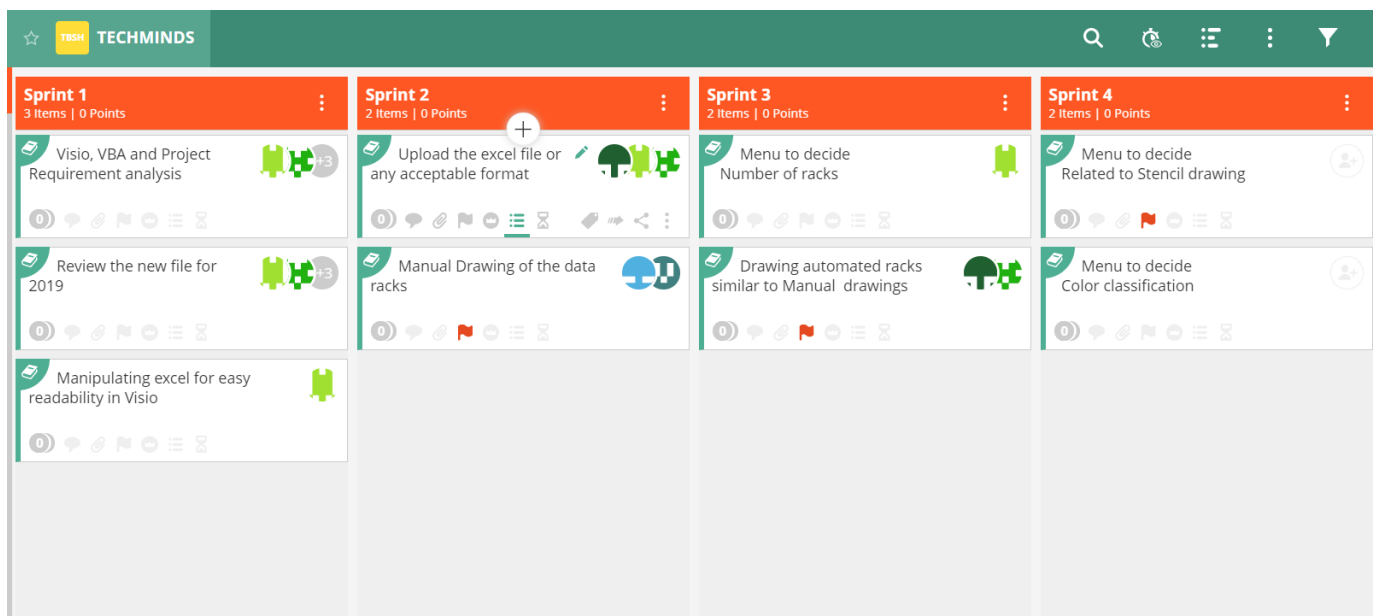

In the meeting on 7th June, with Mr. Berthet, our sponsor, we discussed the progress of the project and how to improve the reports and work progress. We agreed on descopeing the data centre floor map and 3D Prototype because of the non-availability of Microsoft Visio from the beginning of the project.

### Progress:

- Review of the Visio VBA code and detailed study of Individual Modules and each Class
- Implemented the code to increase the number of racks in the display
- Working on 2D drawing with the stencils and the colors of the servers as discussed with the sponsor during the last meeting
- Working to implement the colour code based on criticality as well

### Project management tool:

We are using Vivify Scrum tool for efficient project management. It is a cloud-based agile project management solution that features Scrum and Kanban collaboration boards, team management and time management.

### Roadblocks:

- We are trying to understand more features in VBA
- We are still working on Microsoft Visio 2013 unlicensed version
- We got Microsoft Visio 2016 from Mr. Olivier, but we will continue working on the 2013 version to avoid compatibility issues
